# ONE PLATFORM

TPR Max is a **transformative solution** designed to streamline safety management and compliance across various sectors. By replacing multiple outdated systems, it provides 14 integrated modules that ensure everything you need is available in one platform. From digital check-in to real-time emergency muster capabilities, TPR Max simplifies processes and enhances efficiency. Users benefit from immediate access to essential information without the hassle of juggling between different applications. With its user-friendly interface, organizations can seamlessly transition to this system and begin experiencing its advantages from day one.

The implementation of TPR Max empowers organizations to improve their operational effectiveness while maintaining safety and compliance. **Every module is designed** with practical functionality in mind, addressing crucial aspects such as contractor management, visitor tracking, and incident reporting. This centralized approach allows for better coordination among team members, ensuring that everyone is informed and accountable. As a result, TPR Max not only enhances productivity but also fosters a culture of safety that is essential for today's diverse environments. Experience the power of a single platform that truly brings everything together.

# EMERGENCY MUSTERING

Streamlined evacuation procedures for every situation and site

## ONE-CLICK EVACUATION

Instantly account for everyone on site during emergencies.

## LIVE HEAD COUNTS

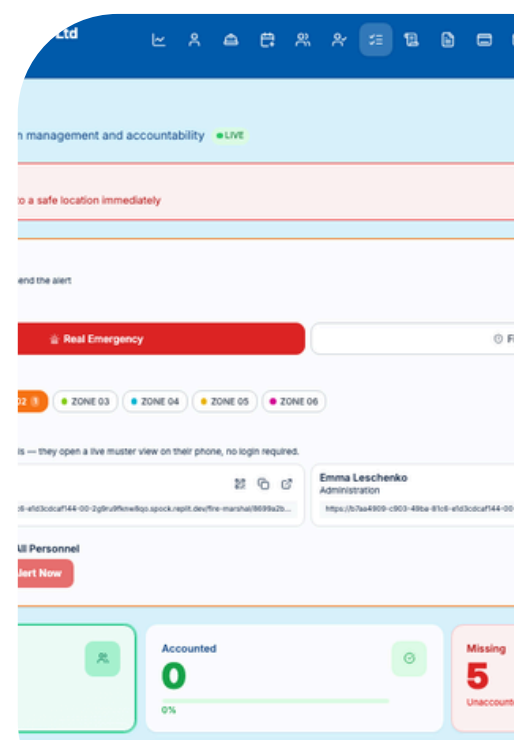

Real-time updates for multiple muster points enhance safety.

## MARTYN'S LAW MODULE

Comprehensive lockdown procedures and incident tracking in place.

Effective emergency mustering is crucial in any scenario. TPR Max provides a **one-click evacuation** feature, ensuring that every visitor, contractor, and staff member is accounted for in real-time. With **live head counts** at multiple muster points, Fire Marshals can access critical information without needing to log in, using a static URL on any phone. This system allows people off-site to mark themselves safe through email notifications. Additionally, the **Martyn's Law module** incorporates lockdown procedures and a comprehensive incident tracker, helping organizations comply with evolving safety regulations. By enabling quick access to vital data and real-time updates, TPR Max enhances emergency response capabilities and ensures the safety of everyone on site.

# Contractor Compliance

Removing legal and insurance risks with robust tracking and management.

## COMPREHENSIVE PROFILES

Create detailed contractor profiles with vital worker records.

## INDUCTION MANAGEMENT

Ensure all inductions are completed before site check-in.

## COMPLIANCE TRACKING

Track certificates, qualifications, and insurance expiry seamlessly.

**COMPREHENSIVE CONTRACTOR PROFILES**  
All contractor and worker records are centralised, accessible and up-to-date.

**MANDATORY INDUCTIONS BEFORE SITE ACCESS**  
TPR Max ensures inductions are completed before any contractor can check in on-site.

**ROBUST COMPLIANCE TRACKING**  
Track certificates, qualifications and insurance expiry dates – all in one place.

**REDUCE RISK**  
Stay compliant and reduce the risk of fines, invalid insurance and legal issues.

**AUDITABLE & ACCOUNTABLE**  
Every interaction is logged, delivering auditable proof of compliance and enhancing transparency.

**Contractor Profile**  
ABC Construction Ltd  
Contractor ID: CON-1028 (APPROVED)  
Status: Active

**Compliance Summary**

| Insurance                                             | Certificates                                      | Qualifications                                      |

**MITIGATE RISK**  
Reduce legal and insurance exposure

**ENSURE COMPLIANCE**  
Stay compliant at all levels

**IMPROVE VISIBILITY**  
Real-time visibility of contractor compliance

**ENHANCE ACCOUNTABILITY**  
Clear records and audit trails for every action

**DRIVE EFFICIENCY**  
Streamline contractor management

Managing contractors effectively is essential for mitigating legal and insurance risks on site. TPR Max simplifies this process by offering **comprehensive profiles** for each contractor, ensuring that all worker records are readily accessible and up-to-date. Induction management is crucial, as TPR Max mandates that inductions must be completed before any contractor can check in on-site. This system guarantees compliance at all levels. Furthermore, the software's **robust compliance tracking** features enable users to keep track of all essential documentation, such as certificates, qualifications, and insurance expiry dates, thereby reducing the risks associated with contractor management. With TPR Max, every interaction is logged, providing auditable proof of compliance, which enhances transparency and accountability across all contractor activities.

# Visitor & Staff Management

Comprehensive solutions for check-in, attendance, ID cards, and more

## Check-in Solutions

TPR Max simplifies visitor check-in with **photo capture** and digital signatures, offering a smooth experience that integrates seamlessly with pre-registration and email invitations.

## Attendance Tracking

Track staff attendance effortlessly with real-time data, daily reports, and seamless integration with Biostar 2, ensuring accurate time keeping and payroll processing.

# Security & Data Trust

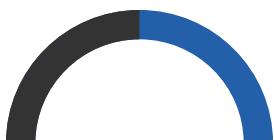

TPR Max prioritizes your data's privacy and security, ensuring that each customer has their own isolated database, meaning your information never coexists with another client's. With a design that is GDPR compliant, TPR Max features robust security measures including CSRF protection, bcrypt passwords, and encrypted sessions. The platform's role-based access guarantees that only authorized personnel can view sensitive data, significantly reducing the risk of unauthorized access. Full audit trails provide visibility into every interaction, ensuring accountability and transparency. This strong privacy infrastructure allows organizations to focus on their core operations without the added stress of data security issues.

Furthermore, TPR Max is ISO 27001 aligned, reflecting our commitment to maintaining the highest standards of information security management. Users benefit from built-in data export capabilities and the right-to-be-forgotten feature, empowering clients to manage their data effortlessly. By prioritizing compliance and security, TPR Max fosters trust among users, which is essential in today's data-driven environment. The platform's meticulous attention to protecting user information not only complies with global regulations but also enhances overall operational efficiency. Clients can utilize TPR Max to ensure that their data-handling practices meet industry standards while safeguarding their organization's reputation and integrity.

# Built for Sites Where Safety Isn't Optional

8 sectors that rely on TPR Max every day

## MANUFACTURING & INDUSTRIAL

High contractor  
footfall, strict H&S  
obligations, regular  
audits.

## CONSTRUCTION SITES

Rotating workforce,  
RAMS requirements,  
site induction  
compliance.

## HEALTHCARE

Contractor vetting,  
visitor records,  
infection control sign-  
off.

TPR Max is relevant to any organisation that has contractors, visitors, or temporary workers on site — and needs to demonstrate it managed them properly.

Facilities Management — multiple sites, multiple contractors, one place to manage them all. Logistics & Warehousing — shift-based staff, delivery contractors, emergency procedures. Education — safeguarding-compliant visitor management, contractor DBS tracking. Local Government & Public Sector — audit trails, compliance evidence, public duty obligations. Serviced Offices & Co-Working — multi-tenant management for shared buildings.
